

Find any decision your board has ever made — in seconds, with the exact page to prove it.

Citation-grounded answers from your own public records — every claim, page-linked.

Built for city councils, school boards, special districts, water boards, planning commissions, and any public governing body that owes its community transparency.

THE PROBLEM

Clerks and staff spend hours every week digging through hundred-page agenda packets, meeting minutes, and municipal codes to answer questions like "when did we last vote on this?" or "what does the zoning code say about parking for a warehouse?" Generic AI chat tools can't be trusted with this — they guess, they hallucinate, and they can't tell you which page a claim came from. For a public body, an unverifiable answer isn't a shortcut, it's a liability.

WHAT COUNCILIQ DOES

- **Ask in plain English, get a sourced answer.** "How much did we pay Terra West Construction for the airport runway project?" — answered with the exact contract amount and a link to the page.
- **Track how a policy evolved across years.** "How has our General Fund budget changed since last year?" — a synthesized answer pulling numbers from multiple budget cycles, each cited.
- **Search your code by section, not by guessing keywords.** "How many parking spaces are required for a warehouse?" — cited directly to the exact code section and table.
- **Built for accountability, not just convenience.** Every citation is clickable and jumps straight to the source page — nothing is ever asserted without a verifiable record behind it.

WHY IT'S DIFFERENT

Generic "chat with your PDF" tools are built for one file, one session, no guardrails. CouncilIQ is purpose-built for the structure of public records — multi-year archives, mixed document types in a single packet, and citation formats that make sense for legal code (section numbers) as well as meeting records (page numbers). A claim without a source is architecturally impossible — not just discouraged.

BUILT FOR HOW SMALL AGENCIES BUY

- No IT department required — upload your existing PDFs.
- Priced to be approved without a formal RFP.
- Role-based access keeps draft/closed-session material restricted.

SECURITY & COMPLIANCE

- Your documents are never used to train any AI model.
- Role-based permissions govern draft vs. public records.
- Full audit logging of uploads, queries, and access.
- Built to meet ADA / Section 508 accessibility standards.

PRICING

Plan	Price	Best For
Starter	\$299/mo	Light meeting volume — unlimited Q&A, page-linked citations
Standard	\$499/mo	Frequent meetings & larger archives — historical cross-year search, code ingestion, priority support

Pricing is preliminary and subject to change prior to public release.
